

alum frame

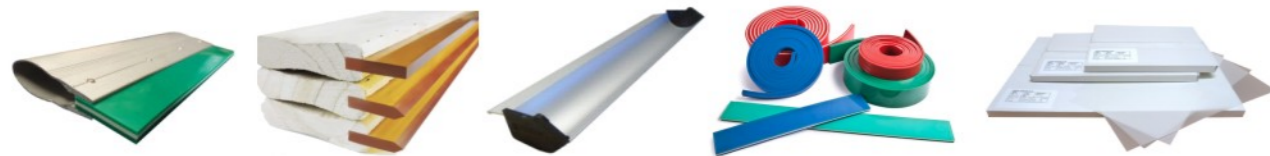

These frames are designed for textile screen printing, it's made of high hardness aluminum alloy and welded by argon arc welder. It's the best choice for applying on automatic textile screen printing machine or manual print.

All frames can satisfy clients' demands and welded for great mesh tension. All corners are completely sealed to prevent water and ink inside. Adhesive side is specially processed by sandblasting or grinding skill to make mesh combining frames fast and easy.

Tube Profile		Wall Thickness		Section View	Suggested Size		Tension
mm	inch	mm	inch		Outer Dimension	by 110W mesh	
12.7x38	0.5 x 1.5	2.0	.078	□	29"x29"	25+5 N

meshed screens

SCREEN RACK

By using high hardness aluminum alloy, argon arc welder, USA adhesive and advanced electric mechanical stretching machine, all clients will get the uniform and stable tension screens. It's water and solvent resist and no needing tape as well.

For screen rack, it's with 25 layers and suitable for O.D 20"x24" and 23"x31" screens.
